

K-Love -

I am a resident of the Phoenix area. There are many things (sights and sounds) as well as a busy schedule that can really ruin your day. However, I find peace and comfort listening to encouraging music through K-love. If you decide to replace the standard FM with LPFM you will not only be replacing K-Love but you will be replacing thousands of listeners that tune in each day for encouragement and music with positive messages. As quickly as the world and especially the US is deteriorating, I think we all could use something positive in our life, and the radio is just about the only thing there. K-love is in the interest of people. Countless lives have been changed through the K-love ministry. Many suicides prevented because the individual had someone to listen and care. Do you think that same person would have found the same hope through one of your LPFM stations? I do not think so too! One life is priceless and because of that I believe that just as you value your life, so think of the lives you will effect. The choice is yours?
